

THETHA NATHI MANIFESTO

A cradle to grave policy approach

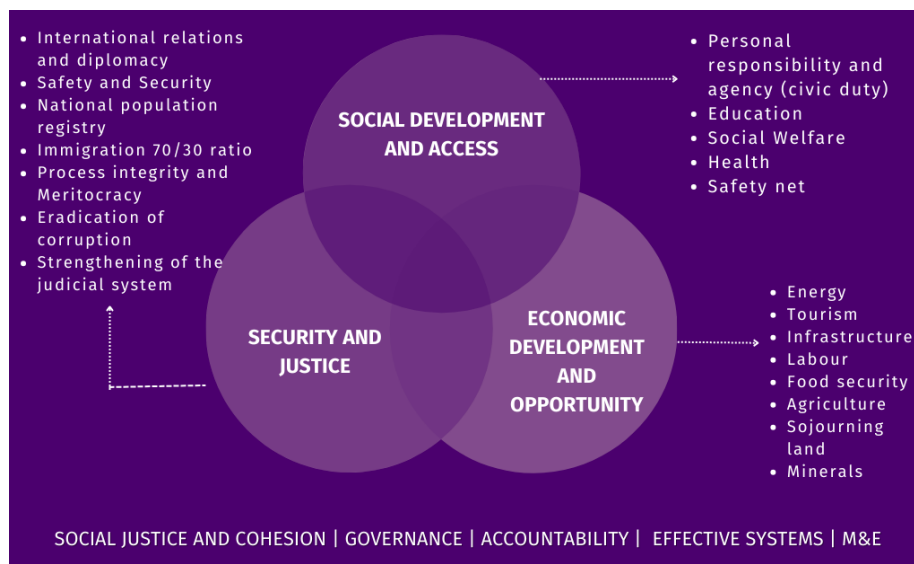

THIS IS THE MAFESTO OF HOPE AND GROWTH:

1. Death penalty for murderers. This will help prevent the senseless murders of innocent people in our communities. We need to restore law and order. It is now or never!
2. Free education from grade zero to the first degree. Currently, hundreds of thousands of learners are excluded from quality education, including tertiary education. Many cannot graduate because they owe money to NSFAS. This is a grave violation of the basic human right, which is access to quality education.
3. Life imprisonment for rapists, without an option for parole.
4. Life imprisonment for fraud and corruption, including politicians and public officials, without an option for parole. Corruption robs the poor of their future and the future of their children's children. It is treasonous.
5. Life imprisonment for those who are convicted of drug-related crimes, without an option for parole. Drugs destroy the future of our children; it robs them of a full life of productivity and a crime against humanity.
6. Health Centres within a 5km radius to all households. This will help the management of TB, STIs, including HIV & AIDS.
7. A police station within a 5km radius to all households to reduce the scourge of crime and underreporting of criminal activities like rape and domestic violence. This is about social justice.
8. We will bring back the old commandos to the police. This will help protect farm workers and farm owners so that we remove the threat to food security in our country.
9. Our raw materials are our wealth. We will use them for job creation in the entire value-chain and only export net products.
10. Our choice of development must recognise human dignity and justice. We will fix apartheid racist special development. We are inclusive in our approach. Dignified social grants to help fight hunger and disease.
11. Dignified social grants to help fight hunger and disease. Food alone is expensive, inflation is way too high.
12. Sanitary pads will be free like condoms in South Africa.
13. All our policies will be scientific driven through empirical and evidence-based data.
14. We will protect our environment and biodiversity. We will invest in climate change programmes to reduce emissions to save the future of the planet Earth.
15. We will fix load shedding in 100 days. Our clean alternative energy programme will include coal as a base for sustainable development.
16. We will half unemployment in 6 years by creating 6 million jobs through energy independence, and radical industrialisation programmes.
17. Ethics will form the basis for our government, we will use meritocracy and get the best person for the job. No Cadre deployment.
18. Our International Relations Policy will put South Africa first and our interests as a nation. We will never sell the country to the highest bidder. Our sovereignty is sacrosanct to A.C.C. We must never shy away from speaking out against those who violate human rights irrespective of who they are,

their geopolitical environment or how powerful they may be. Traditional Leaders will be treated with equal respect and dignity irrespective of which tribe they represent.

19. We will introduce prayer and religious education as part of the curriculum in schools.
20. Land reform is key for growth and redress. We will expropriate strategic land for public benefit and that will be done with reasonable compensation. Whilst we guarantee security of tenure for private property.
21. Traditional Leaders will be treated with equal respect and dignity irrespective of which tribe they represent, or they are close to in authority.
22. We will prioritise legislation that promotes Animal Rights. There will be punitive measures against ill-treatment and abuse of animals in our society.
23. Maintenance Courts will be equipped to facilitate easy access for single parents, especially mothers who have to endure abuse at the hands of the justice system.
24. We will increase the list of Zero-Rated "VAT" on basic Food Products as part of declaring war against hunger. This is compassionate leadership.
25. Fishing quarters will prioritise indigenous traditional fishing communities along the coastal towns of our country. This is about social justice.
26. A 70/30 % rule in the job market. For every 10 jobs, 07 will be reserved for South African citizens and the other 03 can go to any LEGAL immigrant. We are about South Africans citizens first. This helps foster integration and social cohesion. We are a rainbow nation.
27. We will eradicate bucket system in South Africa and give every household full access to piped water, electricity, and a title deed.
28. We will strengthen our borders and build a concrete wall across the entire South African border line. Illegal immigrants will be sent home to help them correct their status; this will stop migration criminality at our border control points.
29. A social market economy will help us facilitate foreign direct investments, grow the economy, eradicate unemployment, end poverty, hunger and burden of disease.

We developed a vision of a **TRIPOD** (a three-point plan), the **CRADLE TO GRAVE** policy approach. This is our bold vision to structure our policy response in crafting the key priorities in government using the following three policy cluster:

VOTE FOR THE CHANGE WE ALL NEED
#SOCIALJUSTICENOW!
QINA MHLALI QINA!!
