Electricity

- Diversifying Energy Sources for Economic Growth and Sustainable Development
- As an independent state of KwaZulu we can significantly increase the production of fuel components, chemical products, and various valuable by-products.
- This expansion will not only lead to the creation of diesel, petrol, liquid petroleum gas, and other essential products but also streamline value-adding processes that contribute to economic growth in our newly established country.

Gas Energy Revolution: A Path to Sustainable Employment and Economic Prosperity. (10 tier plan). Using Ethekwini Municipality as an example this can create 500 000 jobs within 12 months:

1. Establishing gas stations in every second ward of the KwaZulu township to ensure widespread access to clean and affordable energy.
2. Providing gas installations for township households looking to transition from electricity to gas for their heating, cooking, and refrigeration needs.
3. Construction of gas cylinder manufacturing plants across the Metro
4. Construction of the appliance manufacturing plant.
5. Construction of the ward-based gas refill centres.
