

Manifesto Summary

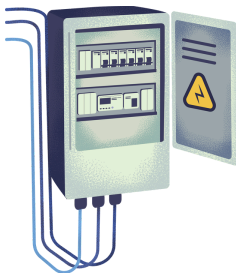

by AfroManifesto

African People's Convention

Electricity

Our energy policy will be to have a combination of renewables, fossil and nuclear energy.

- The APC will always seek to use the most reliable and cheapest form of energy that can sustain, at all times, the needs of the country, both households and industries.
- The APC will keep Eskom as the lead role-player, as a state entity, in the provision of electricity.
- Independent power producers will be encouraged to produce, store and distribute their own electricity without being attached or contracted to Eskom or the State.
- The APC will ensure that any oil or gas production in the country is done by the state in partnership with other companies.
- No foreign company/companies will explore and produce oil or gas without a minimum 30 per cent stake for the state, through Petro SA.
- The state under an APC government will be at the service of the people who will run it not only through normal bureaucracies but with popular organs of the people's power and social audits to ensure transparency, accountability and people's democracy.

African People's Convention Manifesto

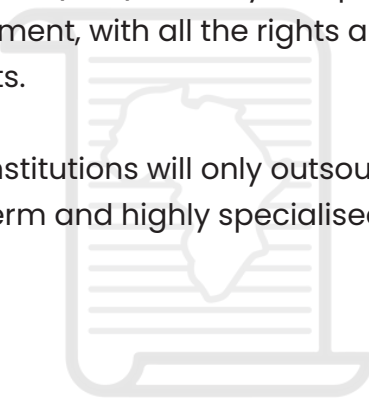

Summary

Employment

An APC government will lead in ending the exploitation and vulnerability of workers by ensuring that outsourced and contract workers in government, constitutional bodies and state owned entities are insourced with full rights and benefits.

- The APC will ban labour broking, and the state would have to lead the way.
- The misery and hardships brought to bear on the working poor borders on criminality.
- The APC would also ensure that all the primary health practitioners as well as early childhood development educators (ECD) are fully and permanently employed by the government, with all the rights and benefits accrued to civil servants.
- State institutions will only outsource services that are very short term and highly specialised.

Summary

Education

- The APCs socialist education will emphasise technical education; agriculture; technology, history; maths and science, economics, geography and all skills necessary to build and sustain the socialist economy.
- The APC will ensure that education managers are the best there can be to ensure that the country's revolutionary goals are achieved.
- The APC will ensure that education infrastructure and facilities are the most appropriate.

Health

The health of the Nation will be a priority for the APC. A healthy nation ensures productivity in the economy and social stability.

- The APC will ensure that health facilities are available to the people within the shortest possible distance.
- Profiteering on health will be highly proscribed.
- The Socialist system will seek to provide high quality of health care.

Summary

Crime

- The APC will seek to strengthen the criminal justice system, simplify processes, quicken sentencing and build a solid partnership between the state and communities.
- Criminal elements within the police and prosecutors must be weeded out firmly.
- Community policing forums must play a central role in cleansing communities of crime.
- The APC will ensure there is a two years' compulsory national service for our youth to be trained in the army militarily and in useful skills to instil patriotism, a sense of purpose and responsibility in life and to protect communities.
